# WORLD IN - UFMA

INTERNATIONAL CAMPUS PROGRAM

**AGEUFMA**  
INTERNATIONALIZATION BOARD

the opportunity to discover  
the world and learn other  
languages and cultures

## International campus Program

## About the project

The WORLD IN Project - UFMA (International Campus Program) is an initiative of the Internationalization Board (AGEUFMA), linked to the Coordination of Mobility, Reception, and Proficiency (CMAP), and proposes the accomplishment of short courses, offered in a foreign language, and in different areas of knowledge and present in the undergraduate and postgraduate courses in this institution.

## The objectives

The main objectives are: to provide a local internationalization experience for students from the Federal University of Maranhão (UFMA), in addition, to attract an increasing number of international students, thus increasing the visibility of our institution. This program facilitates partnerships among teaching staff and students of our University with international professors, which is going to promote the emergence of new agreements and joint research projects. The main objective of the program is, therefore, to promote the dissemination of the production of the researchers of this institution, through linguistic and cultural exchange.

WORLD IN-UFMA constitutes one of the academic mobility and language policy actions for students regularly enrolled in undergraduate and postgraduate courses at this institution as much as other national and International Higher Education Institutions
